CENTRALIZED WEB-BASED INTERACTIVE FLAT PANEL ADMINISTRATION MADE EASY!

Managemyled.com from TouchIT Technologies in an online portal that allows the central management and remote administration of the interactive flat panels in your school or business.

This is a combination of a client-side application that is installed onto the LED and a web-based control panel. When linked together from a unique pairing ID, the interactive flat panels can be remotely administered from anywhere as long as you have an internet connection and a browser.

REMOTE INSTALL / UNINSTALL AND FULL BROWSER-BASED REMOTE CONTROL - ADMIN MADE EASY!

Deploying large numbers of devices into any location can be a total headache to support. With Managemyled.com, we make this whole process simple. Whether you need to install or uninstall an App on a flat panel, or a group of flat panels. Whether you are looking to help out your colleague with a bit of tech support, now, this can now all be done centrally and remotely without having to leave the admin office.

DESIGNED FOR IT TEAMS

Managemyled.com has support for teams of IT professionals as well as individuals that are managing large numbers of interactive flat panels in their organizations. With group profiling for app installation and deployment, we really do make ensuring your colleagues have the correct setup they need on their flat panel easy.

CENTRALIZED MESSAGING AND CRISIS MANAGEMENT

Built into the infrastructure of Managemyled.com is the support for individual and group messaging. Whether you are looking to send notifications for school or business messages or a more formal crisis management alarm we have you covered. All conveniently located in the online portal.
